Profile

Enthusiastic and results-driven Software Engineer with a solid foundation in backend development, cloud computing, and full-stack engineering. Proven ability to build scalable applications, optimize data flows, and deliver high-impact solutions. Seeking an entry-level role at TCS to leverage my technical skills and grow in a collaborative environment.

Education

Bachelor of Technology in Electronics and Communication Engineering
Vishnu Institute of Technology, Bhimavaram | 2021 – 2025

Skills

- Languages:** — Python, Java, JavaScript,HTML
- Frameworks:** — Node.js, FastAPI, Django, React.js,ExpressJs
- CS Fundamentals:** — OOPs, DBMS, OS Basics
- Databases:** — PostgreSQL, MongoDB, Azure SQL
- Web Development:** — REST APIs, Responsive Design, CRUD Operations

Professional Experience

- Full stack Developer Intern-Food Delivery App** 2024/09 – 2024/10
WEBSTACK ACADEMY
- Developed RESTful APIs using FastAPI and Node.js, optimizing query efficiency and response times.
 - Designed and tested frontend components using React.js and integrated with backend services.
 - Performed testing with Postman and wrote unit tests using Jest and Mocha.
- AI Intern – Human Pose Estimation** 2024/12 – 2025/01
Techsaksham (AICTE)
- Increased model accuracy by **25%** via dataset augmentation and preprocessing.
 - Reduced inference latency by **20%**, enabling real-time healthcare posture analytics.

Projects

- Container Shipment Tracker – Real-Time Web App** [🔗](#)
Tech Stack: FastAPI, React.js, MongoDB
- Built a real-time container shipment tracking system with a responsive React.js frontend and FastAPI backend
 - Developed RESTful APIs to handle container data, geolocation updates, and user management.
 - Designed efficient MongoDB schemas to store tracking logs, improving query speed and data retrieval.
 - Integrated role-based access controls for admins and users to securely manage and monitor shipments.
 - Enabled live map updates and status dashboards, improving operational visibility and logistics planning.
- AI-Powered Resume & Job Matching Platform** [🔗](#)
Next.js, TypeScript, OpenAI API, PostgreSQL, Vercel
- Built a **full-stack platform** offering AI-based resume generation and job recommendations.
 - Integrated **OpenAI APIs** for smart content suggestions and job-role alignment, simulating intelligent financial hiring tools.
 - Deployed via Vercel with CI/CD pipelines for a seamless, scalable cloud deployment experience.
- Finance Tracker — Solo Developer, Award-Winning Project** [🔗](#)
Tech Stack: MongoDB, Express.js, React.js, Node.js, Jest
- Designed and implemented a personal finance tracker with real-time budget insights and spending categorization.
 - Applied **Test-Driven Development (TDD)** using **Jest**, and optimized MongoDB query access for 20% faster report rendering.
 - Awarded Best Project (Top 5/100)** at VIT TechFest 2024.

Certifications

- AWS Cloud Fundamentals
- Databricks Lakehouse Fundamentals
- Machine Learning with Python: A Practical Introduction
- Data Engineering with Databricks – edX

ACHIEVEMENTS

- Best Project – Finance Tracker, VIT TechFest 2024 (Top 5 out of 100+)**
- NI LabVIEW Whizz Champion – 2x Consecutive Winner in VIT Tech Fest**
